

CSE486 (Sec-1)

Assignment-2 Report

Name: Leyon Ibn Kamal

ID: 1811050042

This quiz/assignment was for improving on the project of previous assignment, to allow storing multiple university affiliations and storing multiple users in storage.

In the signup activity the form was split into three with a tabview and the data was submitted and stored in file locally. To add multiple user profiles, fragment was used as a template to create multiple forms. After signup it takes to another activity which uses a recyclerview to show multiple user profiles and there is a button to delete all profiles. On clicking the profile it shows the details of the user.
